

Liquid Zinc 9%

MICRONUTRIENT COMPLEX

Read Entire Label Before Using This Product

GENERAL INFORMATION

LIQUID ZINC 9% is especially recommended for citrus crops but may also be used on field, row, vegetable, fruit, tree, vine, ornamental and turf crops. LIQUID ZINC 9% alone, with pesticides, or with other fertilizers, may be applied directly to the soil or to the foliage of growing crops. LIQUID ZINC 9% may be applied via ground sprayer (highvolume or low-volume), aircraft or drip irrigation systems.

DIRECTIONS FOR USE

Soil applications of LIQUID ZINC 9% are recommended with nitrogen fertilizer solutions. Thorough coverage and wetting are needed for optimum foliar spray results. Actively growing plants with young leaves absorb foliar applied LIQUID ZINC 9% most efficiently. Immediate postirrigation or post-rainfall application gives the best foliar uptake. Addition of urea (for example, 5 lbs. Lo-Bi Urea per 100 gallons of spray solution) will enhance foliar uptake of LIQUID ZINC 9%.

COMPATIBILITY: LIQUID ZINC 9% is compatible with most pesticides and fertilizers. However, if the desired combination has not been previously used, a compatibility test is recommended.

MIXING: Shake, stir or swirl contents before using. Always add this product to the spray tank before adding pesticides.

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Lot Number:

GUARANTEED ANALYSIS

Sulfur (S) 4.5%
Zinc (Zn) 9.0%

Derived from zinc sulfate and lignin sulfonate.

- Net Contents: 250 Gal (946 L)
- Net Contents: _____

SOIL APPLICATION - ALL CROPS*

Soil Fertility Maintenance 1-3 qts./acre
Mild Deficiency 2-4 qts./acre
Severe Deficiency 1-3 gal./acre

* The lower rates are for field, row and vegetable crops and the higher rates are for fruit, tree, vine, ornamental and turf crops.

Fertigation: Apply the recommended amount of LIQUID ZINC 9% in split applications one to two weeks apart throughout the growing season.

FOLIAR APPLICATION - ALL CROPS:

LIQUID ZINC 9% applications should be a minimum of 7-14 days apart. Apply 2-4 quarts/acre as needed on a 7-14 day schedule. AVOID foliar applications of LIQUID ZINC 9% when plants are under moisture stress. AVOID foliar applications of LIQUID ZINC 9% to deciduous tree crops during bloom.

Dilute Applications: Apply the suggested dose of product in enough water for thorough coverage.

Concentrate Applications: Use up to 2 quarts of LIQUID ZINC 9% in a minimum of 25 gallons of water.

Aerial Applications: Up to 1 quart of LIQUID ZINC 9% per gallon of spray may be used, but more dilute solutions will improve coverage and results.
