3. HAZARDS IDENTIFICATION

PHYSICAL PROPERTIES

Appearance: White liquid, emulsion
 Odor: Odorless

EMERGENCY OVERVIEW: Caution. Hazards to humans and domestic animals. Harmful if swallowed.

HAZARDOUS DECOMPOSITION PRODUCTS: Thermal decomposition may release toxic and/or hazardous gases.

SYMPTOMS OF ACUTE EXPOSURE:

Inhalation:

Diuron: Overexposure by inhalation may cause liver enlargement, spleen, and thyroid effects, red blood cell destruction, reduction of the blood's oxygen carrying capacity with cyanosis, weakness, or shortness of breath by formation of methemoglobin.
 Ethylene Glycol: The low vapor pressure of this component minimizes the risk of excessive exposure to the vapors at room temperature. Exposure to vapor and mists is possible at elevated temperatures and adverse effects have been reported from exposure to mists. Inhalation of high concentrations of this component can cause irritation to the respiratory tract.

Eye Irritation:

May cause irritation.

Skin Absorption:

Diuron: Slightly toxic on absorption through skin. Temporary skin swelling and redness may occur on contact. Significant skin permeation after contact appears unlikely.
 Ethylene Glycol: May be absorbed through the skin, which may cause damage to kidneys and depression of central nervous system.

Ingestion:

Slightly toxic. Based on animal data, ingestion of ½ pound or more of Diuron (1 pint of formulation) could be fatal to a person.

SYMPTOMS OF CHRONIC EXPOSURE:

Diuron: Long-term exposure to low levels of Diuron is not known to cause any ill effects in humans.
 Ethylene Glycol: Prolonged or repeated exposure to this component's vapors may cause damage to kidneys, liver, lungs, blood, or the central nervous system.

4. FIRST AID

FIRST AID	
IF SWALLOWED:	<ul style="list-style-type: none"> Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow.

	<ul style="list-style-type: none"> Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF IN EYES:	<ul style="list-style-type: none"> Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
IF INHALED:	<ul style="list-style-type: none"> Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
<p>Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact PROSAR at 1-877-250-9291 for emergency medical treatment information.</p>
